Area of a Rectangle	$A = l \cdot w$ or $A = b \cdot h$
Area of a Square	$A = s^2$
Area of a Triangle	$A = \dfrac{1}{2} \cdot b \cdot h$
Area of a Trapezoid	$A = \dfrac{1}{2} \cdot h \cdot \left(b_1 + b_2 \right)$
Area of a Parallelogram	$A = b \cdot h$

**Remember, the BASE and HEIGHT must always form a right angle together!
